

What specialist services or expertise can be accessed by school?

School currently buy into an educational psychology package which allows us to have regular access to an educational psychologist. We also have a resourced provision on site for children with communication and interaction needs. This allows staff to share their specialist knowledge. There is also a speech and language therapist or speech therapy assistant based on site for the majority of the week to work with those pupils who access the Resourced Provision however support is provided to class teachers across school.

School can also refer to other outside agencies that can provide support such as, occupational therapists or specialist learning support teams.
